Measuring Clamp Set EmCheck®

Case content

- Leakage current clamp EmCheck® LSMZ I
- Mesh resistance measuring clamp EmCheck® MWMZ II
- Accessories
- Manual
- Case

Note

Correct and proper grounding and earthing ensures not only the protection of persons from dangerous contact voltages, but also it is a prerequisite for the undisturbed operation of automation systems.

To detect the quality of EMC compatible installation a measurement of the resistance in the potential equalisation by using the mesh resistance clamp EmCheck® MWMZ I and the identification of possible shielding currents through the leakage current clamp EmCheck® LSMZ I is recommended. With the set you have all tools on hand to verify the quality of your EMC conform installation.
