Product

IT6500 Wide Range High-Power DC Power Supply

High-power single unit is up to 30kW

Wide-range over 100 models

Continuous source & sink testing

30kW up/down time < 3ms

Fast curve changing without overshoot

Maintain excellent performance after paralleling

Simple programming on the front panel

Full protection

IT6500 Wide Range High-power DC Power Supplies

APPLICATIONS

- Automotive Electronics
- Electric Vehicle Battery Test
- Battery Simulation
- LED
- Aerospace
- Solar Panel I-V Curve Simulation
- Aviation
- Military

Your Power Testing Solution

IT6500 **Wide Range High-power** DC Power Supplies

Overcome the toughest high power test challenges

With ITECH's latest technology, the IT6500 series offers a full-featured high-performance power test solution. With fast response these DC power supplies provide users with a new level of power supply performance. From 800W to 30 kW, the whole series include more than 100 models. The maximum output voltage and current is up to 1000V and 1200A respectively. With its autoranging capability, it also has a super wide range of voltage and current applications. Users can choose the power supply that fits their testing requirements perfectly.

Choose the right power supplies that fit your test requirements

IT6502D/IT6512/IT6512A/ IT6513/IT6513A	Good performance and compact size, designed for general purpose testing in R&D and production.
IT6500C series	Fast switching between quadrants, even seamless switching can be achieved under certain conditions, multi-functional and with fast response. These power supplies are designed for continuous source and sink testing requirements. Such as automobile electronics, solar panel IV simulation, DC motors, batteries etc.
IT6500D series	High performance with stable output, designed for automobile, green energy, high speed testing, high-power testing etc.

800W	IT6502D 80V/60A/800W					
1200W	IT6512/A 80V/60A/1200W	IT6513/A 150V/30A/1200W

Your Power Testing Solution

IT6500 Wide-range High-power DC Power Supply

Wide-range & High-power

The IT6500 series wide-range of high-power DC power supplies offers a large range of models. From 800W to 30 kW, the whole series include more than 100 models, the maximum output voltage and current is up to 1000V and 1200A respectively. At the same time, it also has super wide range of voltage and current applications. In combination with the IT-E501 power dissipater unit, the current sinking capacity of IT6500C can be up to 100% and the power sinking up to 300% of the Sourcing capability.

With the power dissipater unit, loading capability is expanded

IT6500C series can be used as both a power supply and an electronic load. It greatly enlarges the current sinking range of the power supplies. It enables sinking of current and power, thus it can be applied to applications requiring fast current sink test and batteries charging/discharging test. Each IT-E500 series power dissipater unit provides up to 3kW power sinking capability for the IT6500C series power supply. To meet higher power discharging test demand, multiple power dissipater units' can be paralleled. The IT-E500 series power dissipater unit can extend the current sinking capability up to 100% of the source range and the power sinking capability up to 300% of the Power sourcing capability. (Max. Power sink is 90kW). Meeting demanding requirements of high power discharging test.

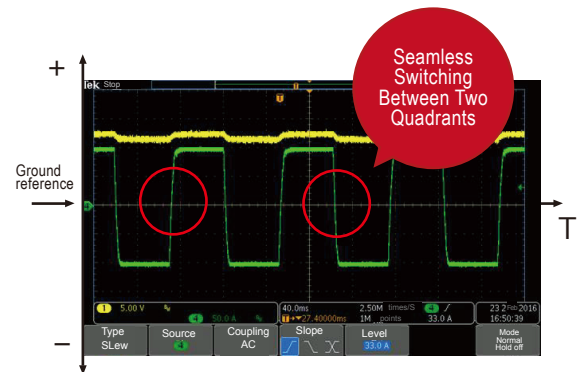

Model	Specification	Volume
IT-E502	80V/120A/3kW	3U
IT-E503	200V/60A/3kW	3U
IT-E504	360V/30A/3kW	3U
IT-E505	500V/20A/3kW	3U
IT-E506	750V/15A/3kW	3U
IT-E507	1000V/10A/3kW	3U

Seamless switching between quadrants

For traditional two-quadrant power supply, there will be a short jump and discontinuity across positive and negative currents. As a high-speed two-quadrant power supply, IT6500C (1800W-30kW) series has Loop-Mode function so as to realize high-speed current transition between power supply mode and electronic load mode, to achieve fast switching between sourcing and sinking current, even can achieve seamless switching under certain conditions, thus avoiding overshoot of voltage or current. That enables it to be suitable for fast battery charging and discharging measurements without sacrificing accuracy and can be widely used in energy storage device testing, such as batteries, battery encapsulation and battery protection panel etc.

Electric Vehicle Battery Test-Braking Current Regenerative Simulation

Hybrid battery pack

For practical electric vehicle (EV) battery test, the ultra-realistic simulation of regenerative braking current is necessary, the whole test should be finished within 10ms. So the simulation result depends on the response speed of the relating testing device.

1. Traditional solution: Adopt two single units, such as DC Power Supply + Electronic Load, which is of complex configuration, low efficiency and thus can't meet the testing requirements;
2. ITECH solution: IT6500C provides fast and seamless switching across current outputting and sinking, combined with IT-E500 power dissipater unite, IT6500C can meet the testing requirements easily. It is an ideal solution for EV braking current's regenerative battery test.

Your Power Testing Solution

IT6500 Wide-range High-power DC Power Supply

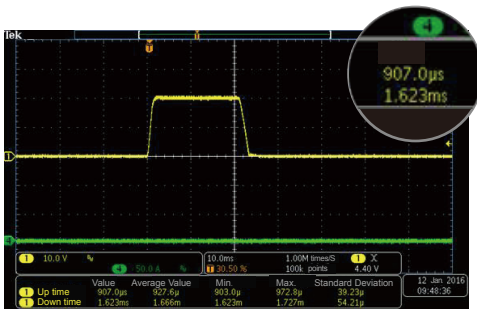

FAST Fast response

Independent settable slew rate in different modes

IT6500C series can be used as a power supply and an electronic load. As a power supply, CV, CC, CP modes are available. As an electronic load, CC and CP mode are available. IT6500C supports independent adjustable rise/fall time setting in different modes.

For every single model of IT6500C/D series, no matter it is a single unit or multiple units paralleled together, the rise and fall time of each power supply in IT6500C/D series are the same. Take IT6522C as an example:

- Within 30V voltage range, with 0-90% load, up and down speed <3ms
- Falling time of no load with voltage at full scale:
Without power dissipater unit, falling time <30ms
With power dissipater unit, falling time <5ms
- Dynamic response time <3ms

DC ratings of single unit IT6522C: 80V/120A/3000W

Voltage ratings: 10V

Current ratings: 120A

Load Current: 0A

DC ratings of single unit IT6522C: 80V/120A/3000W

Voltage ratings: 10V

Current ratings: 120A

Load Current: 100A

No matter whether it is in the power supply mode (CV, CC, CP) or in the electronic load mode (CC, CP), IT6500 series has adjustable rise and fall time, and the settable range is 1ms-24h.

CC/CV PRIORITY Fast curve changing without overshoot CC & CV Priority Function

To conquer the demanding testing requirements existing for a long time in various applications, ITECH developed an innovative industry-leading CV & CC priority concept. The IT6500 is available for high-speed test applications with-out overshoot. Users can chose the desired output mode. Voltage high-speed mode or current no overshoot mode by choosing the loop response speed and loop operation mode. It is suitable for high-power integrated circuit test, charging / discharging test, military, solar array simulation and the transient simulation / characteristic of automotive electronics.

Fast voltage built with turn-on over range inrush current (CV-High, CC-Low, CV takes precedence)

Battery charging / discharging test with seamless and no overshoot switching (CV-High, CC-High, CC takes precedence)

MAINTAIN EXCELLENT PERFORMANCE AFTER PARALLELING

Built-in paralleling of multiple power supplies with even current distribution

IT6500 has built-in paralleling capability up to 30kW. At the same time, IT6500C supports multiple power supplies paralleling together in master-slave mode. Even further it can ensure that each power supply equally shares the load current and they all remain in the desired mode. In the traditional sense, when paralleling power supplies together, different power supplies will operate in different operation modes. For instance, when two sets of power supplies are paralleled together, one will offer a majority of current in CC mode, and the other will offer only a small part of current in CV mode, which will degrade certain power supplies' performance specifications. The even current distribution ability of the IT6500 ensures each power supply equally shares the load current without degrading the performance specifications. When paralleling multiple IT6500 the combined system has all the same functions as a standalone unit. That is a great way to add power flexibility to your test system. What is particularly unusual is that after the expansion of power, IT6500C can still maintain the excellent dynamic characteristics of the single unit to meet the I-V characteristic curve testing demanding a variety of high-power high-speed applications.

Your Power Testing Solution

IT6500 Wide-range High-power DC Power Supply

Low voltage & high current test

Standalone set IT6522C

80V, 120A, 3000W
Voltage ratings: 10V
Current ratings: 120A
Load current: 100A

8 sets of IT6522C paralleling together

Voltage ratings: 10V
Current ratings: 960A
Load current: 800A

High voltage & low current test

Standalone set unit IT6522C

80V, 120A, 3000W
Voltage ratings: 80V
Current ratings: 120A
Load current: 30A

8 sets of IT6522C paralleling together

Voltage ratings: 80V
Current ratings: 960A
Load current: 300A

Dynamic response test

Standalone set IT6522C

80V, 120A, 3000W
Voltage ratings: 10V
Current ratings: 120A
Load current:
Level A=10A
Level B=100A
F=10 Hz

8 sets of IT6522C paralleling together

Voltage ratings: 10V
Current ratings: 960A
Load current:
Level A=100A
Level B=800A
F=10Hz

* Figure: Voltage-Yellow, Current-Green

From the tests, we conclude:

1. Voltage rise time: 8 units of IT6522C paralleling together, the voltage rise time is faster than single unit operation.
2. Fall time: parallel units remain the same as single unit.
3. Dynamic response waveforms: parallel units remain the same as single unit.

Simple programming on the front panel (List)

Similar to other modern ITECH products, the IT6500 series provides a user friendly front panel for quick programming without the need for external software.

In list mode, the IT6500 series can store, recall and run the preset customized program sequences via front panel programming. Users can edit the voltage/current value & the time of each step in advance and provide the power supply with a trigger signal. Then the preset sequences / waveform will be executed automatically according to the defined LIST. That's especially suitable for the applications such as DC / DC converters, inverters voltage drop test, engine start-up simulation, battery charging / discharging tests, product life cycle tests and aircraft test etc.

Waveforms programmed with IT6500 series by engineers

Soft Start Testing

D/D Converter Sag Testing

Voltage Step Waveform

D/D Converter Surge Testing

D/D Converter Cycle drop Testing

Life Cycle Testing

Pulse Charge of Battery

Line Regulation Testing

*Output test with no load

Your Power Testing Solution

IT6500 Wide-range High-power DC Power Supply

Functions for special applications

Programmable output impedance

In battery charging and discharging test, the changes of internal resistance should be taken into account. For enhancing test precision, IT6500C series power supply provides built-in internal resistance setting function which can simulate battery operation status in real-case.

Multiple actual working status simulation of batteries

Solar panel I-V curve simulation function

IT6500C series high power DC power supply is equipped with SAS1000 solar array simulation software, which can accurately simulate the solar array I-V curve. With built-in EN50530 / Sandia / NB/T32004 / CGC/GF004 / CGC/GF035 SAS module. Users can set the parameters to simulate I-V curve characteristic output and generate reports. These benefit much in test of the static & dynamic maximum power tracking performance of photovoltaic inverters.

* SAS1000 solar array simulation software is available for choice

* Figure: Voltage-Yellow, Current-Green

Built-in standard automotive power network voltage curves

The automobile electronics devices must tolerate the dropouts or surges from power turn-on or turn-off transient. For these tests, it is necessary to simulate the worst-case power transient conditions. IT6500C series power supply provide built-in DIN40839, ISO-16750-2, SAEJ1113-11, LV124 and ISO21848 testing curves. Users can select any built-in curve to do the DUT performance test directly according to their demand. 12V, 24V and 48V are available for choice.

Multiple built-in interfaces

In conventional high power test instrument, extra interfaces add cost. In the IT6500 series all the implemented interfaces are built-in standard. Simplifying the configuration process and adding flexibility to change interface used without adding additional cost.

Cost saving	IT6500C	IT6500D	IT6512 IT6513	IT6502D IT6512A IT6513A
Analog control interfaces	√	√	√	√
USB	√	√	√	√
RS232	√	√	√	√
RS485	-	-	√	√
GPIB	√	√	√	√
LAN	√	√	-	-
CAN	√	√	-	-

Full protections

Integrating protection measures into test instruments is critical and high cost especially in high power test. To provide fully protections for DUTs, IT6500 series integrate multiple fast protection measures.

These protection capabilities include:

- CC & CV Priority Function to avoid unwanted overshoot
- Power Supply mode: OVP,OCP,OPP
- Electronic Load mode: OCP,OPP,OTP (IT6500C)
- Turn-off protection
- Under voltage protection (UVP)

^{*1} Setup Accuracy refers to users use panel keys or communication commands to achieve setup accuracy; when using external analog programming, the programming accuracy is 1%

^{*2} Readback Accuracy refers to users use panel display or communication commands to achieve readback accuracy; when using external analog monitoring, the monitor accuracy is 1%

^{*3} Rise and Fall Time refers to the settling time of setup value from one value to another using the internal standard power dissipator in the ON state

*1 Setup Accuracy refers to users use panel keys or communication commands to achieve setup accuracy; when using external analog programming, the programming accuracy is 1%

*2 Readback Accuracy refers to users use panel display or communication commands to achieve readback accuracy; when using external analog monitoring, the monitor accuracy is 1%

*3 Rise and Fall Time refers to the settling time of setup value from one value to another using the internal standard power dissipator in the ON state

Your Power Testing Solution

IT6500 Wide-range High-power DC Power Supply

Parameter		IT6502D	IT6512	IT6512A	IT6513	IT6513A
Output Rating (0°C~40°C)	Voltage	0~80V	0~80V	0~80V	0~150V	0~150V
	Current	0~60A	0~60A	0~60A	0~30A	0~30A
	Power	0~800W	0~1200W	0~1200W	0~1200W	0~1200W
Load Regulation ±(% of Output+Offset)	Voltage	≤0.01%+8mV			≤0.05%+30mV	
	Current	≤0.1%+10mA			≤0.1%+30mA	
Line Regulation ±(% of Output+Offset)	Voltage	≤0.02%+2mV			≤0.02%+20mV	
	Current	≤0.02%+2mA			≤0.02%+10mA	
Setup Resolution	Voltage	1mV			3mV	
	Current	1mA			1mA	
Readback Resolution	Voltage	1mV			3mV	
	Current	1mA			1mA	
Setup Accuracy (Within 12 months, 25°C±5°C) ±(% of Output+Offset)	Voltage	≤0.02%+30mV			≤0.05%+30mV	
	Current	≤0.1%+0.1%FS			≤0.2%+0.1%FS	
Readback Accuracy (Within 12 months, 25°C±5°C) ±(% of Output+Offset)	Voltage	≤0.02%+30mV			≤0.05%+30mV	
	Current	≤0.2%+0.1%FS			≤0.2%+0.1%FS	
Ripple (20Hz-20MHz)	Voltage	≤30mVp-p			≤60mVp-p	
	Current	≤20mA _{rms}			≤40mA _{rms}	
Temp. Coefficient	Voltage	≤0.02%+30mV			≤0.02%+30mV	
	Current	≤0.05%+10mA			≤0.05%+10mA	
Readback Temp. Coefficient		≤0.02%+30mV ≤0.05%+5mA			≤0.02%+30mV ≤0.05%+5mA	
Dimension (mm)		415mmW×44mmH×500mmD				
Weight (kg)		8.5kg				

IT6512 / IT6513 / IT6512A / IT6513A / IT6502D Model

Machine size

Width: 414.5mm
Height: 44.5mm
Depth: 500mm
