## **Isolation Tester, Milliohmmeter, TRMS Multimeter, Short-Circuited Coil Tester**

3-447-034-03 6/7.21

- Insulation resistance measurement up to 3.1  $G\Omega$  with interference voltage detection, test voltages: 50, 100, 250, 500 and 1000 V per EN 61557-2 (METRAHIT IM XTRA BT / METRAHIT IM E-DRIVE BT only)
- DAR: dielectric absorption rate, PI: polarization index (METRAHIT IM XTRA BT / METRAHIT IM XTRA BT only)
- 4-wire milliohm measurement (Kelvin connection) with 200 mA or 1 A measuring current for the precise measurement of extremely small resistances with a resolution of 1  $\mu\Omega$
- 2-wire RIo measurement with 200 mA test current per EN 61557-4 (METRAHIT IM XTRA BT / METRAHIT IM E-DRIVE BT only)
- Short-circuited coil test with 1000 V and optional COIL adapter (METRAHIT IM XTRA BT / METRAHIT IM E-DRIVE BT only)
- Multifunctional measuring instrument (V, A,  $\Omega$ , F, Hz, $^{\circ}$ C/ $^{\circ}$ F, %) (METRAHIT IM XTRA BT / METRAHIT IM E-DRIVE BT only), RPM (METRAHIT IM XTRA BT / METRAHIT IM E-DRIVE BT only)
- TRMS  $_{AC + DC}$  measurement for current/voltage value up to 10/100 kHz
- Current measurement direct or with clamp sensors with adjustable CLIP factor
- Capacitance measurement
- Precision temperature measurement °C, and °F for RTD and TC-K sensors
- Diode measurement ( $I_K = 1 \text{ mA}$ ,  $U_{Flow}$  up to 4.5 V) and continuity testing
- Data logger thanks to integrated memory module and real-time clock, individual measurements as well
- Programmable sequences for test routines (METRAHIT IM XTRA BT / METRAHIT IM E-DRIVE BT only)
- Color graphic display
- **Modular power supply:** standard guick-change rechargeable lithium battery. change without interrupting the measuring circuit thanks to touch protected module socket
- Automatic blocking sockets for the current input
- Test probe with START (ISO) and STORE keys
- Housing with IP52 protection, dust protected and drip-proof, replaceable rubber holster
- Interfaces: Bluetooth
- IZYTRONIQ windows software for documentation, preparation of test reports

**600 V CAT IV** 1000 V CAT III

reddot award 2018 winner industrial design

## Applications

The METRAHIT IM XTRA BT, METRAHIT IM E-DRIVE BT and METRAHIT IM **TECH BT** are portable, extremely rugged multimeters designed for use in the field. They're suitable for maintenance, service and diagnosis at electric machines, drive units and systems, for example in automotive, energy and automation applications.

METRAHIT IM XTRA BT and METRAHIT IM E-DRIVE BT multimeters are all-in-one instruments: insulation tester, milliohmmeter, short-circuited coil tester and universal multimeter. They're ideal for safety testing and diagnosis at electric and hybrid vehicles, as well as all types of electric machines.

The METRAHIT IM XTRA BT and the METRAHIT IM E-DRIVE BT make it possible to test coils for short-circuits within an inductance range of 10 µH to 50 mH (at 100 Hz) in combination with the optional COIL Adapter 50mH. This range corresponds to motors in accordance with DIN standards with power ratings of roughly 15 kVA to 80 MVA. A universal adapter for motors with medium power ratings is in preparation.

METRAHIT IM TECH BT is a handy ALL-In-ONE universal multimeter and milliohmmeter.

## **Features**

Insulation Resistance Measurement with Interference Voltage Detection (METRAHIT IM XTRA BT / METRAHIT IM E-DRIVE BT only)

Insulation resistance measurement with test voltages of 50 to 1000 V. If interference voltage of greater than 15 V AC or 25 V DC is detected during insulation measurement, the device issues an optical and acoustic warning whereupon measurements cannot be launched. Afterwards, automatic switching to TRMS<sub>AC+DC</sub> voltage measurement at 1 M $\Omega$  takes place and the currently measured voltage is displayed as Uext.

## Polarization Index (PI) (METRAHIT IM XTRA BT / METRAHIT IM E-DRIVE BT only)

When test voltage is applied, insulation resistance is measured after one minute and after ten minutes. The polarization index is the ratio which results from the two measured values. In the case of electric drive units, a value of at least 2 indicates intact insulation and a value of greater than 4 indicates very good insulation.

## Isolation Tester, Milliohmmeter, TRMS Multimeter, Short-Circuited Coil Tester

## Absorption Index (DAR) (METRAHIT IM XTRA BT / METRAHIT IM E-DRIVE BT only)

Practically speaking, the absorption index test is a quick polarization index measurement. The ISO values measured after 30 and 60 seconds are used to generate a ratio.

### Kelvin Connection for 4-Wire Measurement (4-L) (milliohm measurement)

The 4-wire measurement compensates for influences resulting from cable and contact resistances which must not be neglected when measuring very small resistances. Measuring current can be set to 200 mA or 1 A. In this way, even extremely small contact resistances can be measured, for example at welded and riveted joints and on aircraft outer skins (lightning protection and wick test), or equipotential bonding is measured in accordance with UN ECE R100 in hybrid and electric vehicles.

# 2-Wire RIo Measurement with 200 mA Test Current per EN 61557 (METRAHIT IM XTRA BT / METRAHIT IM E-DRIVE BT only)

Low-resistance measurement per EN 61557-4 for earth, protective and equipotential bonding conductors. If excessive interference current is detected during insulation measurement, the device issues an optical and acoustic warning whereupon measurements cannot be launched.

#### **RMS Value with Distorted Waveform**

The utilized measuring method allows for waveform-independent TRMS measurement of alternating quantities (AC) and pulsating quantities (AC and DC) for voltage and current at up to 100 kHz.

### Activatable Filter for V AC Measurement

A 1 kHz low-pass filter can be activated if required, for example when measuring cables with parasitic external signals. The input signal is checked by a voltage comparator for dangerous voltages as long as the low-pass filter is activated, and these are indicated at the display if applicable.

## Diode Testing with Constant Current $I_k = 1 \text{ mA}$

Testing of the polarity of diodes and checking for short-circuits and interruptions in electrical circuits. The test voltage source makes it possible to measure LEDs and reference diodes up to 4.5 V, e.g. also white LEDs.

## Fast Acoustic Continuity Test $I_k = 1 \text{ mA}$

Testing for short-circuiting or interruption in the  $\mathbb{Q}$ ) switch position. The threshold value for acoustic signaling can be set to 1, 10, 20, 30, 40 or 90  $\Omega$ .

### **Automatic/Manual Measuring Range Selection**

Measured quantities are selected with the rotary switch.

The measuring range can be automatically matched to the measured value, or selected manually for quick, repetitive measurements.

#### Color Graphic Display

A high-resolution transmissive  $3\frac{1}{2}$ " TFT color graphic display with  $320 \times 480$  dots is used for measured values and menu navigation. The display is easily readable from all directions, as well as under difficult lighting conditions (controllable with light sensor). Graphic representation permits user-friendly menu navigation including help texts.

## Analog Bar Graph for Quick Trend Displays

The bar graph (with additional negative axis range for zero-frequency quantities) permits faster detection of measured value changes as compared with digital value displays.

## **Display Resolution**

High resolution with 30,000 digits and a basic accuracy of 0.15%.

## **Automatic Storage of Measured Values**

The DATA HOLD function automates the storage of measured values after they have settled in. A patented process assures that random values are not saved to memory in the case of rapidly changing measured quantities, but rather the actual measured value. The stored measured value is displayed as a digital value. The bar graph continuously indicates the momentary measured value.

#### Overload Protection

Overload protection safeguards the instrument in all measuring functions for up to 1000 V. Voltages of greater than 1000 V and currents of greater than 1 A are indicated acoustically. FUSE appears at the display if the fuse for the current or  $m\Omega$  measurement input blows.

## Battery Charge Level - Power Saving Circuit

The battery charge level is accurately indicated in the graphic display.

The device is switched off automatically if the measured value remains unchanged for a period of between 10 and 59 minutes (adjustable), if none of the controls are activated during this time and continuous operation is not activated.

## Automatic Blocking Sockets (ABS) 1

All current ranges are implemented via a single connector jack which prevents any possibility of operator error.

The automatic blocking sockets prevent incorrect connection of the measurement cables, as well as selection of the wrong measured quantity. Danger to the user, the instrument and the device under test resulting from operator error is thus ruled out.

<sup>1</sup> patented (patent no. EP 1801 598 and US 7,439,725)

## **Housing and Protective Cover for Harsh Conditions**

- New housing design
- Separate fuse compartment
- Quick-change rechargeable battery

The instrument is protected against damage in the event of impacts or dropping by means of a soft rubber cover with tilt stand. The rubber material also assures that the instrument doesn't wander if it's set up on a vibrating surface.

#### **Data Interfaces**

The instrument can be remote configured and momentary and saved measurement data can be read out via Bluetooth. For PC, the complete software IZYTRONIQ or METRAHIT IM Data Reader is required to this end. For smartphones and tablets with Android™, the METRALOG app is available.

Interface protocol and device driver software for **LabVIEW** (National Instruments  $^{\text{TM}}$ ) are available upon request.

## Voluntary Manufacturer's Guarantee

36 months for materials and workmanship. <sup>2</sup>

- 1 year for calibration.
- Detailled information and conditions available at https://www.gmc-instruments.de/en/company/terms-and-conditions-of-delivery/

## DAkkS calibration certificate

The multimeter is furnished with a DAkkS calibration certificate, which is also recognized internationally (EA, ILAC).

After the user-specified calibration interval has elapsed (recommended interval: 1 to 3 years), the multimeter can be inexpensively recalibrated in our proprietary DAkkS calibration laboratory.

## Isolation Tester, Milliohmmeter, TRMS Multimeter, Short-Circuited Coil Tester

## **Overview of Included Features**

Function	METRAHIT IM XTRA BT IM E-DRIVE BT	METRAHIT IM TECH BT
$V_{DC}$ (Ri = 9 M $\Omega$ )	•	•

Measuring category	1000 V CAT III, 600 V CAT IV	1000 V CAT III, 600 V CAT IV

Due to the system, the DC component indicated in the smallest measuring range (300 mV) has an offset. For a precise measurement of the DC component, please select measuring function VDC.

## **Standard Equipment** (depending on Device Variant)

- Multimeter with rubber holster
- HC40 hard case (for multimeter and accessories) (Z270K: black or Z270H: orange)
- 1 Quick-change, rechargeable lithium polymer battery with USB power pack (5 V DC, 2 A) (Z270A or Z270G)
- Probe (with start/stop and store/send function) (Z270S) (METRAHIT IM XTRA BT and METRAHIT IM E-DRIVE only)
- Cable set KS17-2 (1 pair of safety measurement cables, red/ black, with 4 mm test tips) (GTY362003P0002)
- Pair of KC4 Kelvin clips (Z227A) (METRAHIT IM XTRA BT and METRAHIT IM TECH BT only)
- KC&S Kelvin clip and Kelvin probe (Z227C) (METRAHIT IM E-DRIVE BT only)
- DAkkS calibration certificate
- Condensed operating instructions
- \* Comprehensive operating instructions available on the Internet for download from www.gossenmetrawatt.com

$M\Omega_@$ U $_{ m IS0}$	50 100 250 500 V 1000 V	1.2x U <sub>ISO</sub> 1.12x U <sub>ISO</sub>	1.0 mA	< 1.4 mA	U > 1000 V	1000 V≅	10 s

# Short-Circuited Coil Test (only METRAHIT IM XTRA BT or METRAHIT IM E-DRIVE BT and with optional COIL Adapter)

Measuring Range	Resolution	Nominal Voltage U <sub>SET</sub>	Intrinsic Uncertainty at Reference Conditions ± (% rdg. + d)
0.3 1000 V ≅ ¹		$Ri = 1M\Omega$	3 + 30 > 100  digits
10.0 30.9 µs	0.1 [µs]	1000 V	10 + 5 digits
31 250 µs	1 [µs]	1000 V	10 + 5 digits

 $<sup>^{1}</sup>$  TRMS interference voltage measurement (V  $_{AC+DC}$ ) with 1 M $\Omega$  input resistance, frequency response width:  $>65\ldots500$  Hz, accuracy: 3%+30 digits

Inductance measuring ranges of optional COIL adapters:

COIL adapter XTRA (Z270M): 10 µH up to 5 H
 COIL adapter 50mH (Z270F): 10 µH up to 50 mH

#### **Internal Clock**

Time format DD.MM.YYYY hh:mm:ss

Resolution 0.1 s (measured values time stamp)

Accuracy ±1 minute per month

Temperature

influence 50 ppm/K

## **Reference Conditions**

 $\begin{array}{ll} \text{Ambient temperature} & +23 \ ^{\circ}\text{C} \pm 2 \ \text{K} \\ \text{Relative humidity} & 40\% \dots 75\% \end{array}$ 

Measured quantity

frequency 45 Hz ... 65 Hz Measured quantity waveform Sinusoidal Supply voltage 4.0 V  $\pm$ 0.1 V

## Influencing Quantities and Influence Error

Influencing Quantity	Sphere of Influence	Measured Quantity / Measuring Range	Influence Error (% rdg. + d) / 10 K		
		V <del></del>	0.2 + 5		
		$_{ m V} \simeq$	0.4 + 5		
		$300~\Omega$ $3~\text{M}\Omega$	0.5 + 5		
	0 °C +21 °C	30 MΩ	1 + 5		
Temperature	and	and		mA/A <del></del>	0.5 + 5
	+25 °C +40 °C	mA/A ≃	0.8 + 5		
		30 nF 300 μF	2 + 5		
		Hz	0.2 + 5		
		°C/°F (Pt100/Pt1000)	0.5 + 5		

With zero balancing

## Frequency Influence for $V_{AC} \ V_{AC+DC}$ Voltage Ranges

	Deviation <sup>1</sup>			
Frequency Range	300 mV range ± ( % rdg. + d)	3 V, 30 V, 300 V range 2 ± ( % rdg. + d)	1000 V range <sup>2</sup> ± ( % rdg.)	
15 Hz 45 Hz	2 + 30	2 + 30	2 + 30	
> 65 Hz 1 kHz	0.5 + 30	0.5 + 30	1 + 30	
> 1 kHz 10 kHz	2 + 30	1.5 + 30	10 + 30	
> 10 kHz 20 kHz	3 + 30	1.5 + 30	_	
> 20 kHz 50 kHz	3 + 30	5 + 30	_	
> 50 kHz 100 kHz	10 + 30	10 + 30	_	

<sup>1</sup> For sinusoidal input signals > 10% to 100% of the range (mV range: as of 30% of range, at 1% to 10% of the range: f < 50 kHz, intrinsic error increased by 0.2% of the upper range limit.

## Frequency Influence for $I_{AC}$ / $I_{AC+DC}$ Current Measuring Ranges

	Influence Error 1				
Frequency Range	300 $\mu$ A to 300 mA $\pm$ ( % rdg. + digits)	1 A range ± ( % rdg. + digits)			
15 Hz 45 Hz	2 + 30	2 + 30			
> 65 Hz 1 kHz	1 + 30	1 + 30			
> 1 kHz 2 kHz	1 + 30	1 + 30			
> 2 kHz 5kHz	1 + 30	3 + 30			
> 5 kHz 10 kHz	5 + 30	5 + 30			

For sinusoidal input signals > 10% to 100% of the range.

Influencing Quantity	Sphere of Influence	Measured Quantity / Measuring Range	Influence Error <sup>1</sup>
Crest Factor CF	1 3	V . A .	± 1% rdg.
CIEST LACTOL OF	> 3 5	V ∼, A ∼	+ 3% rda.

<sup>1</sup> Except for sinusoidal waveform

Influencing Quantity	Sphere of Influence	Measured Quantity	Influence Error
Relative Atmospheric Humidity	75% 3 days instrument off	V, A, Ω, F, Hz, °C	1 x intrinsic uncertainty
Battery Voltage		ditto	included in intrinsic uncertainty

Influencing Quantity	Sphere of Influence	Measured Qty. / Measuring Range	Damping
	Interference quantity max. 1000 V ~	V <del></del>	> 90 dB
Common Mode Interference		3 V ~	> 90 dB
Voltage	Interference quantity max. 1000 V ~ 50 Hz 60 Hz, sinusoidal	30, 300 V ~	> 150 dB
	00 112 111 00 112, 0111400144	1000 V ∼	> 150 dB
Series Mode Interference Voltage	Interference quantity: V ~ , respective nominal value of the measuring range, max. 1000 V ~ , 50 Hz 60 Hz sinusoidal	V <del></del>	> 50 dB
ĺ	Interference quantity max. 1000 V —	V ~	> 50 dB

The time value may vary for different COIL adapters by up to 10 %. This has no influence whatsoever if you perform the measurements with the same COIL adapter and compare them with each other.

Overload capacity of the voltage measurement input: power limiting: frequency x voltage max. 6 x 10<sup>6</sup> V x Hz at > 100 V

## Isolation Tester, Milliohmmeter, TRMS Multimeter, Short-Circuited Coil Tester

## **Response Time** (after manual range selection)

Measured Quantity / Measuring Range	Digital Display Response Time	Measured Quantity Jump Function	
V <del></del> , V ∼ A <del></del> , A ∼	1.5 s	from 0 to 80% of upper range limit value	
300 Ω 3 MΩ	2 s		
30 MΩ, MΩ <sub>@</sub> U <sub>ISO</sub>	Max. 5 s		
Continuity	< 50 ms	from ∞ to 50% of upper range limit value	
°C (Pt 100)	Max. 3 s	or apportange initiation	
<b>→</b>	1.5 s		
30 nF 300 μF	Max. 5 s	from 0 to 50%	
>10 Hz	1.5 s	of upper range limit value	

## Fuse

Current measuring ranges F1: FF 1 A/1000 V AC/DC,

& 4-wire m $\Omega$  measuring ranges 6.3 x 32 mm

Fuse with breaking capacity of 30 kA at 1000 V AC/DC, protects the current measurement input in

the 300  $\mu A$  to 1 A ranges

2-wire m $\Omega$  measuring F2: FF 0,315 A/1000 V

ranges 6.3 x 32 mm

(METRAHIT IM XTRA BT and Fuse with breaking capacity of 30 kA

METRAHIT IM E-DRIVE BT only) at 1000 V AC/DC

## Display

TFT color graphic display (55 x 36 mm) with analog and digital display including unit of measure, type of current and various special functions

#### **Background Illumination**

Activated background illumination can be regulated by means of a light sensor.

## Analog Bar Graph

Scaling linear

Polarity display with automatic switching

Measuring rate 40 measurements per second and display

refresh

## **Digital Measured Value Display**

Resolution /

char. height 320 x 480 dots, 12 mm

Number of places 31,000 / 3100

4%-place in the V, A, Hz and  $\Omega$  measuring functions, depending on parameter setting

Overflow display "OL" is displayed for ≥ 31,000 digits

or ≥ 3100 digits

Polarity display "-" (minus sign) is displayed

if plus pole is connected to "L"

Measuring rate 10 and 40 measurements per second with the Min-Max function except for the capac-

itance, frequency and duty cycle measur-

ing functions

Refresh Rate 2 times per second, every 500 ms

## **Power Supply**

Battery module 3.7 V, 4000 mAh, LiPo (approx. 25% self-discharge per year)

Service life approx. 20 hours (without  $M\Omega_{ISO}$  mea-

surement / R<sub>Lo</sub> / R 4-wire measurement)

Battery indicator Battery charge level display via battery

symbol: , querying of momentary exact charge level in % via menu function

Power OFF function The multimeter is switched off automatically:

when battery voltage drops to below approx. 3.6 V

 if none of the keys or the rotary switch are activated for an adjustable duration (10 to 59 min.) and the multimeter is not in the continuous operation mode

Rechargeable battery modules can only be recharged externally.

Measuring Function	Nominal Voltage U <sub>N</sub>	Resistance of the DUT	Service Life in Hours	Number of Possible Mea- surements with Nominal Current per EN 61557
V			20 1	
V ~			15 <sup>1</sup>	
RINS	100 V	1 ΜΩ	5	
	100 V	100 kΩ		300
	500 V	500 kΩ		60
	1000 V	2 ΜΩ		20

<sup>&</sup>lt;sup>1</sup> Times 0.7 for interface operation

## **Electrical Safety**

Protection category II per EN 61010-1

Measuring category CAT III CAT IV

Nominal Voltage 1000 V 600 V

Pollution degree 2

Test voltage 7.4 kV~ per EN 61010-1

## **Electromagnetic Compatibility (EMC)**

Interference emission EN 61326-1 class B

Interference immunity EN 61326-1

Short-term measured value deviation of up to 10% may occur during electromagnetic interference thus reducing the specified operating quality.

## Isolation Tester, Milliohmmeter, TRMS Multimeter, Short-Circuited Coil Tester

## **Ambient Conditions**

0 °C to +40 °C Accuracy range

Operating temperatures (Storage temperature

-10 °C ... +50 °C with batteries)

-20 °C ... +50 °C with rubber holster Storage temperatures -25 °C ... +70 °C (without battery) 40 to 75%, no condensation allowed

to 2000 m Elevation

Deployment Indoors, except within specified ambient

conditions

## **Data Interface**

Relative humidity

Туре Bluetooth 4.2 2.402 ... 2.480 GHz Frequency band Transmitting power max. 91 mW

**Functions** - Query measuring functions

and parameters

- Query momentary measurement data

## Internal Measured Value Storage

Memory capacity 64 MBit for approx. 300,000 measured

values with indication of date and time

## **Mechanical Design**

Impact resistant plastic (ABS) Housing

 $235 \times 105 \times 56$  mm (without rubber **Dimensions** 

holster)

Weight approx. 0.7 kg with battery module Housing: IP 52 (pressure equalization by Protection

means of the housing)

Excerpt from table on the meaning of

IP Codes

IP XY (1 <sup>st</sup> digit X)	Protection against foreign object entry	IP XY (2 <sup>nd</sup> digit Y)	Protection against the penetration of water
0	not protected	0	not protected
1	≥ 50.0 mm dia.	1	vertically falling drops
2	≥ 12.5 mm dia.	2	vertically falling drops with enclosure tilted 15°
3	$\geq$ 2.5 mm dia.	3	spraying water
4	$\geq$ 1.0 mm dia.	4	splashing water
5	dust protected	5	water jets
