### Boost your efficiency with quad-core power

The five models with 400 W or 800 W provide maximum power at a variety of operating points. The two or four 200 W outputs can each supply up to 64 V or up to 20 A. Electrically equivalent outputs can be wired in series or parallel for up to 250 V or 80 A.

All R&S®NGP800 power supplies include remote sense terminals, a USB port and a LAN interface. A user-installable GPIB interface, a digital trigger I/O, an analog input and a wireless LAN interface are optional, making these instruments great on the bench or in an automated test system.

## Large high resolution touchscreen

The home screen gives a clear overview of all channels. Each channel can be selected for a more detailed view containing a wide variety of additional information such as statistics and icons indicating the status of set protection levels and special functions.

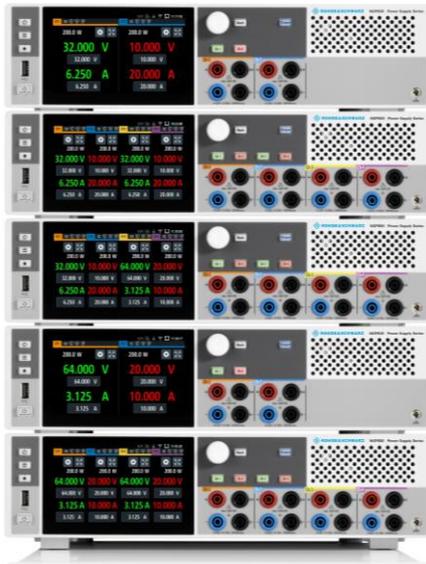

## Parallel and serial operation

For applications requiring more voltage or current, the outputs can be connected in series or parallel to attain up to 250 V (R&S®NGP824) or 80 A (R&S®NGP804). When using the tracking function, the voltage and current are simultaneously adjusted on all selected channels.
