# **1-Port USB VNA - R60** Extended Specifications

- Patent US 9,291,657 No test cable needed
- Frequency range: 1 MHz 6 GHz
- Measurement time per point: 100 µs min typ.
- Automation programming in LabView, Python, MATLAB, .NET, etc.
- Up to 100,001 measurement points
- Time domain and gating included standard

# EXTEND YOUR REACH<sup>™</sup>

# **Specifications**<sup>1</sup>

#### **Measurement Range**

| Impedance                               | 50 Ohm                |
|---|-----------------------|
| Test port connector                     | type N, male          |
| Number of test ports                    | 1                     |
| Frequency range                         | 1 MHz to 6 GHz        |
| Full frequency accuracy                 | ±2.5·10 <sup>-6</sup> |
| Frequency resolution                    | 20 Hz                 |
| Number of measurement points            | 2 to 100,001          |
| Measurement bandwidths (with 1/3 steps) | 10 Hz to 100 kHz      |
| Cable loss measurement range            | 35 dB                 |
| Dynamic range <sup>2</sup>              | 109 dB typ.           |

#### **Measurement Accuracy<sup>3</sup>**

| Accuracy of reflection measurements <sup>4</sup>             | Magnitude / Phase |
|--|-------------------|
| -15 dB to 0 dB   | ±0.4 dB / ±3°     |
| -25 dB to -15 dB   | ±1.0 dB / ±6°     |
| -35 dB to -25 dB   | ±3.0 dB / ±20°    |
| Accuracy of transmission magnitude measurements <sup>s</sup> | Magnitude         |
| -50 dB to 0 dB   | ±1 dB             |
| Trace noise magnitude <sup>6</sup>                           | 0.005 dB rms      |
| Temperature dependence                                       | 0.015 dB/°C       |

#### **Effective System Data**

| 1 MHz to 6 GHz      |          |
|---------------------|----------|
| Directivity         | 46 dB    |
| Source match        | 40 dB    |
| Reflection tracking | ±0.05 dB |

#### **Factory-Calibrated System Data**

| 1 MHz to 4 GHz |       |
|----------------|-------|
| Directivity    | 36 dB |
| 4 GHz to 6 GHz |       |
| Directivity    | 32 dB |

#### **Uncorrected System Performance**

| 1 MHz to 6 GHz |                    |
|----------------|--------------------|
| Directivity    | 15 dB (18 dB typ.) |
| Source match   | 15 dB (18 dB typ.) |

[1] All specifications subject to change without notice. [2] Measurement of |S21| and |S12| using two reflectometers, both being connected to the same USB hub, applies over the temperature range of  $(23 \pm 5)$  °C after 30 minutes of warming-up, with less than 1 °C deviation from the calibration temperature at high output power and IF bandwidth 100 Hz. [3] Reflection and transmission measurement accuracy applies over the temperature range of  $(73 \pm 9)$  °F or  $(23 \pm 5)$  °C after 30 minutes of warming-up, with less than 1 °C deviation temperature, at 0 dBm output power and IF BW 100 Hz. Frequency points have to be identical for measurement and calibration (no interpolation allowed). [4] Reflection specifications are based on an isolating DUT. [5] Transmission specifications are based on a matched DUT. Measurement of |S21| and |S12| using two devices, both being connected to the same USB hub. [6] IF bandwidth 1 kHz. © Copper Mountain Technologies Rev. 2019Q1

#### **Test Port**

| Power range           | -35 dBm to -3 dBm (-40 dB to 0 dB, typ.) |
|-----------------------|--|
| Power resolution      | 0.25 dB typ.                             |
| Power accuracy        | ±1.5 dB typ.                             |
| Interference immunity | +17 dBm                                  |
| Damage level          | +23 dBm                                  |
| Damage DC voltage     | 50 V                                     |

### **Measurement Speed**

| Time per point | 100 µs typ. |
|----------------|-------------|
|                |             |

# **Frequency Reference Input**

| Port                         | Ref 10 MHz     |
|------------------------------|----------------|
| External reference frequency | 10 MHz         |
| Input level                  | 0 dBm to 4 dBm |
| Input impedance              | 50 Ohm         |
| Connector type               | SMA, female    |

### **Frequency Reference Output**

| Port  | Ref 10 MHz      |
|---|-----------------|
| Internal reference frequency                      | 10 MHz          |
| Output reference signal level at 50 Ohm impedance | -1 dBm to 5 dBm |
| Connector type                                    | SMA, female     |

### **Trigger Input**

| Port                    | TRIG IN / OUT              |
|-------------------------|----------------------------|
| External trigger source | 3.3 V CMOS, TTL compatible |
| Pulse width             | ≥1 µs                      |
| Polarity                | positive or negative       |
| Input impedance         | ≥10 kOhm                   |
| Connector type          | SMA, female                |

# **Trigger Output**

| Port               | TRIG IN / OUT              |
|--------------------|----------------------------|
| Max output current | 20 mA                      |
| Trigger output     | 3.3 V CMOS, TTL compatible |
| Polarity           | Positive or negative       |
| Connector type     | SMA, female                |

### System & Power

| Operating system  | Windows 7 and above |  |
|-------------------|---------------------|--|
| CPU frequency     | 1.0 GHz             |  |
| RAM               | 2 GB                |  |
| Interface         | USB 2.0             |  |
| Connector type    | Mini USB B          |  |
| Power consumption | n 3.5 W             |  |

#### Calibration

| Recommended factory adjustment interval |
|---|
|---|

#### Dimensions

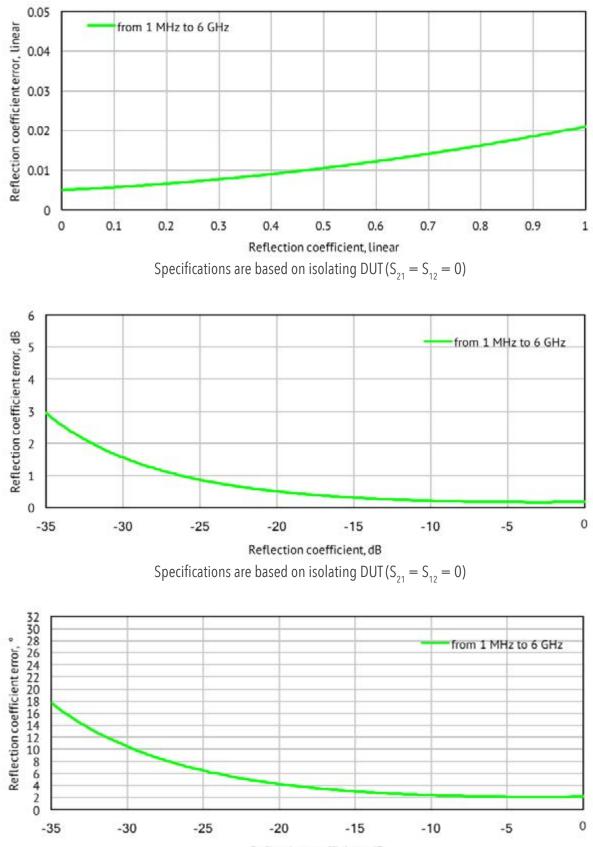

| Weight | 0.35 kg (12.3 oz) |
|--------|-------------------|
| Length | 161 mm            |
| Width  | 65 mm             |
| Height | 28 mm             |

# **Environmental Specifications**

| Operating temperature | +5 °C to +40 °C (41 °F to 104 °F)   |  |
|-----------------------|-------------------------------------|--|
| Storage temperature   | -50 °C to +70 °C (-58 °F to 158 °F) |  |
| Humidity              | 90 % at 25 °C (77 °F)               |  |
| Atmospheric pressure  | 70.0 kPa to 106.7 kPa               |  |

# **Reflection Accuracy Plots**

### **Reflection Magnitude Errors**

Reflection coefficient, dB

Technology is supposed to move. It's supposed to change and update and progress. It's not meant to sit stagnant year after year simply because that's how things have always been done.

The engineers at Copper Mountain Technologies are creative problem solvers. They know the people using VNAs don't just need one giant machine in a lab. They know that VNAs are needed in the field, requiring portability and flexibility. Data needs to be quickly transferred, and a test setup needs to be easily automated and recalled for various applications. The engineers at Copper Mountain Technologies are rethinking the way VNAs are developed and used.

Copper Mountain Technologies' VNAs are designed to work with the Windows PC you already use via USB interface. After installing the test software, you have a top-quality VNA at a fraction of the cost of a traditional analyzer. The result is a faster, more effective test process that fits into the modern workspace. This is the creativity that makes Copper Mountain Technologies stand out above the crowd.

We're creative. We're problem solvers.
