Site-Log LPC-1 / LPCB-1 Data Logger

Product Specifications
OVERVIEW

The Site-Log LPC-1/LPCB-1 is an 8-channel, battery powered, stand alone current DC data logger. The logger records up to 4 mega-byte of data and stores it in non-volatile flash memory for later retrieval. Input current signals can be from sensors, transducers, transmitters or any other common current sources.

Featuring an aluminum enclosure and conformal coating PCB, the Site-Log data logger has excellent performance in the harshest industrial environment.

Powered by a16-bit ADC and programmable input range, the Site-Log data loggers are well suited to science and laboratory applications where precise and accurate measurement is critical.

FEATURES

High Data Resolution:
The 16-bit analog-to digital converter meets most high-resolution requirements.

Large Memory Size:
The 4-Mega-Byte Memory stores years of measurements.

Programmable Input Ranges:
One on-board thermistor channel monitors ambient temperature. Seven range-programmable voltage external input channels cover wide measurement requirements.

Multiple Communication Interfaces:
The Site-Log data loggers can be accessed via USB, MODEM, or Ethernet connections with auto baud rate of up to 115 kbps.

Its on-board TTL serial port and USB interfaces meet most communication requirements.

TTL Serial Port

USB Port
10-Year Battery Life:

The internal lithium battery provides over 10 years of instantaneous logging operation when sampling at an interval of one minute.

Fast Sampling Mode:

The Site-Log data loggers can log data with the sampling interval as fast as 20 milliseconds, replacing data acquisition devices.

Alarm and Excitation Output:

The Site-Log data logger notifies the alarm condition over alarm terminal strips or communication lines. (USB, Serial Port, MODEM)

Excitation control turns on the power of external transmitter/transducer only when the logger is sampling.

Alarm & Excitation Control
Rugged Physical Design:

The rugged aluminum enclosure and coated PCB makes the Site-Log data loggers perfect in the harshest industrial environment.

Aluminum Case
Powerful Software:

SiteView is a Windows-based application which works with the Site-Log Series data loggers for downloading, configuration, data analyzing and plotting.

Its user-friendly graphic interface plus powerful functionalities fit both novice and advanced users.

The versatility of custom equation and custom-line equation handle complicated measurement requirements.
